Projects Website

Education

10/2021 – 5/2024	M.Sc. Computer-Aided Conception of Machines in Mechanical Engineering *RWTH Aachen*	CGPA : 1,6
8/2016 – 6/2020	B.Tech in Mechanical Engineering *Punjab Engineering College, Chandigarh*	CGPA : 8.3/10
4/2014 – 3/2016	High School (10+2) *Bhavan Vidyalaya, Chandigarh*	Percent : 94.4%

Work Experience

Master Thesis Student **October 2023 - March 2024**
Rheinmetall Technology Centre - New Technologies, Rheinmetall AG, Neuss, Germany
Distributed Data-Fusion and Control over a network of Unmanned Aerial Vehicles

- Development of a localization algorithm for a swarm of GPS-denied UAVs using Ultra-wideband (UWB) sensors.
- Development of a simulation model of an integrated flight control system for a single UAV, including a flight controller, 6 degree-of-freedom UAV dynamic model, IMU, Magnetometer, Barometer and GPS sensor models and an Extended Kalman Filter for attitude estimation.
- Design of an attitude estimation filter based on attitude error rotation vector dynamics.

Werkstudent (Working Student) **June 2022 - September 2023**
Rheinmetall Technology Centre - New Technologies, Rheinmetall AG, Neuss, Germany

- Development of a mathematical model for the force analysis of a flexible electrostatic synchronous actuator based on the concept of *Method of Moments*, a discretization technique for electric fields.
- Maintainance of the developed mathematical model code-base, making use of software engineering principles like object orientation, version control and comprehensive code documentation

Project Assistant **October 2022 - April 2023**
Institut für Getriebetechnik, Maschinendynamik und Robotik (IGMR), RWTH Aachen

- Scripting Multi-Body simulation models of a standard mountain bike in Simpack using the *Semi-Analytical Approach* where the multibody model partly depends on real-time sensing of loads on the actual bike.
- Setting up co-simulation between Simpack and Simulink in a closed loop simulation for stabilizing the multibody model of the bike excited by the measured loads.
- The work in this project culminated in a mini-thesis worth 9 ECTS, which can be accessed *here*.

Research Assistant **September 2020 - July 2021**
Thapar Institute of Engineering and Technology, Patiala, India

- Dynamic modeling of a strength augmentation exoskeleton designed by *Defence Bio-Engineering and Electro-Medical Laboratory* (DEBEL), a branch of *Defence Research and Development Organization* (DRDO), India

- Reduced-order modeling of Human and Lower Extremity Exoskeleton in the form of a coupled multi-body system.
- Development of a Computed Torque Control algorithm for strength augmentation.
- Various sections of the work done for this project are being submitted in various journals and conferences related to Biomechanics and Multi-Body Dynamics, and all published work can be referred from *Conference Presentations and Publications* section.

Technical Skills

Programming	Computational Techniques
1. **Scripting Languages** • MATLAB & Simulink • Python 2. **Programming Languages** • C++ • Java 3. **General** • Object-Oriented Programming • Version Control using Git	1. Multi-Body Dynamics 2. Finite Element Analysis (Static and Dynamic) 3. Regression and Classification using Neural Networks 4. Method of Moments in Electrostatics 5. Strapdown Algorithms for Inertial Navigation 6. State Estimation using Extended-Kalman Filters 7. Sensor Fusion
