Education

| | | |
|------------------|--|-----------------|
| 10/2021 – 4/2024 | M.Sc. Computer-Aided Conception of Machines in Mechanical Engineering <i>RWTH Aachen</i> | CGPA : 1,6 |
| 8/2016 – 6/2020 | B.Tech in Mechanical Engineering <i>Punjab Engineering College, Chandigarh</i> | CGPA : 8.3/10 |
| 4/2014 – 3/2016 | High School (10+2) <i>Bhavan Vidyalaya, Chandigarh</i> | Percent : 94.4% |

Work Experience

Master Thesis Student/Working Student

October 2023 - Ongoing

Rheinmetall Technology Centre - New Technologies, Rheinmetall AG, Neuss, Germany

- Development of a localization algorithm for a swarm of GPS-denied UAVs using Ultra-wideband (UWB) sensors.
- Embedding the developed localization algorithm into Arducopter, an open-source auto-pilot for UAVs, in order to facilitate verification of the algorithm through flight tests.
- Development of a simulation model of an integrated flight control system for a single UAV, including a flight controller, 6 degree-of-freedom UAV dynamic model, IMU, Magnetometer, Barometer and GPS sensor models and an Extended Kalman Filter for attitude estimation.

Werkstudent (Working Student)

June 2022 - September 2023

Rheinmetall Technology Centre - New Technologies, Rheinmetall AG, Neuss, Germany

- Development of a mathematical model for the force analysis of a flexible electrostatic synchronous actuator based on the concept of *Method of Moments*, a discretization technique for electric fields.
- Maintenance of the developed mathematical model code-base, making use of software engineering principles like object orientation, version control and comprehensive code documentation

Project Assistant

October 2022 - April 2023

Institut für Getriebetechnik, Maschinendynamik und Robotik (IGMR), RWTH Aachen

- Scripting Multi-Body simulation models of a standard mountain bike in Simpack using the *Semi-Analytical Approach* where the multibody model partly depends on real-time sensing of loads on the actual bike.
- Setting up co-simulation between Simpack and Simulink in a closed loop simulation for stabilizing the multibody model of the bike excited by the measured loads.
- The work in this project culminated in a mini-thesis worth 9 ECTS, which can be accessed [here](#).

Research Assistant

September 2020 - July 2021

Thapar Institute of Engineering and Technology, Patiala, India

- Dynamic modeling of a strength augmentation exoskeleton designed by *Defence Bio-Engineering and Electro-Medical Laboratory (DEBEL)*, India

- Reduced-order modeling of Human and Lower Extremity Exoskeleton in the form of a coupled multi-body system.
- Development of a Computed Torque Control algorithm for strength augmentation.
- All published work output from this project can be referred from *Conference Presentations and Publications* section.

Technical Skills

| Programming | Computational Techniques |
|--|---|
| <ol style="list-style-type: none"> Scripting Languages <ul style="list-style-type: none"> • MATLAB & Simulink • Python Programming Languages <ul style="list-style-type: none"> • C++ • Java General <ul style="list-style-type: none"> • Object-Oriented Programming • Version Control using Git | <ol style="list-style-type: none"> 1. State Estimation using Extended-Kalman Filters 2. Strapdown Algorithms for Inertial Navigation 3. Sensor Fusion 4. Regression and Classification using Neural Networks 5. Multi-Body Dynamics 6. Finite Element Analysis (Static and Dynamic) 7. Method of Moments in Electrostatics |
